Customer Reviews

Mark Dutton, PT Allegheny General Hospital West Penn Allegheny Health System (WPAHS)

Adjunct Clinical Instructor, Duquesne University School of Health Sciences Pittsburgh, PA

This book is a great, quick resource for the clinic. The kindle edition is easy to navigate with a comprehensive table of contents and search function. This makes it so easy to have with you on your tablet for patient education or to search for a topic while on the go. It is surprisingly comprehensive for a "survival guide". I could not be more pleased with this purchase!

Very concise information regarding most cases typically seen in outpatient orthopedics. This book has been very helpful, and it is organized by joint, with resourceful lists of special tests and graduated interventions.

This is a good book. I love Dutton as he is detailed. I just think it's a little too big for a survival guide. Personally, I bring Michael Wong's pocket book and a FULL sized orthopedic book by Brotzman.

Those two make a great 1-2 punch. When I brought this survival book to clinic, I always had to revert to Brotzman, or when I needed something real quick, I always used Wong's pocket book. Then eventually I realized I just needed the other two but not this one.

This book is a great reference book for students. Small enough to carry around to clinical affiliations when you need info fast. It offers brief info on various ortho conditions with their suggestions. It also has a differential diagnosis section for the ortho conditions, just in case any red flags appear. I highly recommend this to all PT students.

I am so happy I decided to buy this book to take with me to my first outpatient orthopedic clinical. Great information and easy to find what you are looking for!

this was a gift for my daughter (too expensive though), who is studying to be a PT, she loves it, will keep in her library for further use

I bought this as a Kindle book. I wish I had bought the regular copy. Can't recommend it highly enough.

Great study guide and resource while I was on my rotation!
