# Estimation Of The Time Since Death, Third Edition

## Synopsis

Estimation of the Time Since Death remains the foremost authoritative book on scientifically calculating the estimated time of death postmortem. Building on the success of previous editions which covered the early postmortem period, this new edition also covers the later postmortem period including putrefactive changes, entomology, and postmortem resonance spectroscopy. Entomology and the radiocarbon test are now included, as they may be of significance in the early postmortem period. Because of the increasing importance of postmortem imaging, a chapter on cross-sectional imaging and the postmortem interval has been added. The book also describes in detail a new mathematical approach to narrow down the postmortem interval derived from the compound method (conditional probability in death time estimation). A unique work of synthesis combining rigorous science with practical guidance, the book has been improved, updated, reformatted, and extended in scope. Redesigned in colour throughout, it continues to be an invaluable resource and also the standard for the estimation of the time since death.

## Book Information

Hardcover: 292 pages

Publisher: CRC Press; 3 edition (September 24, 2015)

Language: English

ISBN-10: 1444181769

ISBN-13: 978-1444181760

Product Dimensions: 11.1 x 8.5 x 0.7 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #671,195 in Books (See Top 100 in Books) #167 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Forensic Medicine](#) #329 in [Books > Medical Books > Medicine > Internal Medicine > Pathology > Forensic Medicine](#) #571 in [Books > Law > Criminal Law > Forensic Science](#)

## Customer Reviews

Edited by Burkhard Madea, MD, director, Institute of Forensic Medicine, University of Bonn, Germany

The gold standard on the argument. Giovanni Pierucci
