Maternal Child Nursing Care, 4e

Synopsis

This market-leading textbook provides just the "right amount" of maternity and pediatric content in an easy-to-understand manner. Divided into two sections, the first part of the book includes 28 chapters on maternity nursing and the second part contains 27 chapters covering pediatric nursing. Numerous illustrations, photos, boxes, and tables clarify key content and help you quickly find essential information. And because it's written by market-leading experts in maternity and pediatric nursing, you can be sure you're getting the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX® examination.

UNIQUE! Nursing Alerts point out critical information to consider when caring for patients.

UNIQUE! Guidelines boxes outline instructions for skills or procedures in an easy-to-follow, step-by-step format. UNIQUE! Emergency boxes offer quick reference to emergency procedures for critical maternity and pediatric emergencies. UNIQUE! Home Care boxes offer helpful guidelines for delivering effective care in the home environment. UNIQUE! Atraumatic Care boxes in the pediatric section illustrate how to provide competent nursing care without creating undue physical or psychological stress for pediatric patients, families, and nurses. UNIQUE! Community Focus boxes examine community issues and provide resources and guidance on caring for families outside the clinical setting. UNIQUE! Cultural Awareness boxes address culturally competent care for patients with a variety of customs and beliefs. UNIQUE! Family-Centered Care boxes discuss the family's role and needs in caring for the patient. UNIQUE! Nursing Process boxes offer quick access to nursing process information for major diseases and conditions. Critical Thinking Exercises provide case scenarios to promote sound clinical decision making. Nursing Care Plans include rationales for interventions and provide specific guidelines for delivering effective nursing care. Patient Teaching boxes highlight important information for communicating continuing care instructions to patients and families. New and consolidated content on pain assessment and management focuses on this key aspect of pediatric nursing. Updated content on evidence-based practice illustrates how current research can be used to improve patient outcomes. The latest information in the field is included throughout, including expanded coverage of the late preterm infant and fetal heart rate pattern identification.

Customer Reviews

Great buy!! Thanks!!

This book is not useful for students. No bolded terms, no glossary, no review questions at the end of the chapters. My class also found two instances where the book completely contradicted itself on the same page. The main text said one thing, but the box above it would say the complete opposite. We actually had test questions thrown out because of it. It is almost like one author wrote the main text and someone else wrote the boxes, but they never communicated about what they were writing. This book has lots of good info of course, but it is not organized to truly help a nursing student learn. I went out and bought my own Peds and OB books for studying because this text was so bad. If it wasn't for those I would never have pulled an A and an A- in these subjects. Horrible book!

Got this as the previous edition "required" by my class (Spring 2015). Much cheaper and I didn't feel like I missed any information by getting the previous edition

This text book is one of the worst textbooks I have ever used! It is poorly written, poorly organized, full of redundant information, goes on forever about nonsense and then barely covers more significant topics. Every time I tried to use this text to obtain more information on a condition/disease etc. it did not have what I was looking for or needed. Huge disappointment and waste of money!!!! I bought this book because it was required for my program and found it so frustrating that I ended up using an older text that had far more current and relative information in it. This text is the most

unreadable book I have ever set eyes on. Even our instructors have expressed disappointment with this book. Don't waste your money! Maternal Child Nursing Care (Wong, Maternal Child Nursing Care)

I learned A LOT from this textbook. I think I read like 80% of this textbook for my maternity/pediatric class. I love that it gets pretty in detail about the nursing interventions and even things that you can tell patients to do at home to take care of problems. The boxes, tables, charts were also all very helpful, especially on the days before exams when you don't have enough time to read the chapters. :D

I found this book to be full of errors and full of fluff. The important information is so condensed that you could overlook it. The other information is redundant--almost as if the authors had to fluff up the book to meet nursing school standards of hauling around 3 inch books. There aren't any NCLEX style questions in this textbook. The study guide (purchased separately) is a joke--too many errors in the answer keys and the questions are a joke. I highly recommend picking another book by another author if you are allowed.

I bought two Samsung Galaxy travel charger with two USB cables and both not working. Both seem to be defective.

The description on this book said it was BRAND NEW. The book I received is not brand new, it is used with highlighting in it and the cover is worn down. Do not list items as brand new if they are used. If i wanted a used book i would have chose to pay \$18.99 not top dollar at \$124.99. Very dissatisfied with this seller and will never buy from them again.
