# Chemistry And Biology, Volume 50 (The Alkaloids)

## Synopsis

Chemistry and Biology is a celebration of the outstanding contributions to the field by Professor R.H.F. Manske, who founded the series in 1950. This special volume demonstrates the dramatic changes in alkaloid chemistry since then. It also offers a unique overview of recent developments in major areas of alkaloid chemistry and biology and looks at how these areas will develop in the future. These fourteen contributions are written by many of the leading alkaloid chemists in the world, and thus comprise a unique view of alkaloids and their contributions to the health and well-being of humankind. Indispensable reference work written by leading experts in the field. Provides up-to-date, timely reviews on compounds and classes of great interest. Covers synthesis, biosynthesis, biology, as well as isolation and structure elucidation. An essential research tool for anyone working with alkaloids from a chemical or biological perspective.

## Book Information

Series: The Alkaloids (Book 50)

Hardcover: 590 pages

Publisher: Academic Press; 1 edition (October 30, 1997)

Language: English

ISBN-10: 0124695507

ISBN-13: 978-0124695504

Product Dimensions: 6 x 1.3 x 9 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #14,219,731 in Books (See Top 100 in Books) #53 in [Books > Science & Math > Chemistry > Alkaloids](#) #5052 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Biochemistry](#) #9295 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Pharmacology](#)

## Customer Reviews

"....as one might expect for a fiftieth edition, this volume is especially rich in chapters that present interesting historical perspectives from a number of internationally known senior investigators in the field....All of the chapters in this volume are neat, well-proofed, and attractively illustrated, with a uniform format differing from one chapter to the next only in the structure drawing style....this volume is a particularly valuable entry in the series, and departmental libraries should make every effort to acquire it." --JOURNAL OF NATURAL PRODUCTS, 1998 "Authoritative, precise, thorough,

and above all, permeated with enthusiasm." --JOURNAL OF PHARMACEUTICAL SCIENCES "The most authoritative treatise on alkaloids." --JOURNAL OF NATURAL PRODUCTS "An indispensable addition to the library of anyone in the field of alkaloid chemistry." --JOURNAL OF THE AMERICAN CHEMICAL SOCIETY "The present volume [Volume 50] is a particularly rewarding one with thirteen reviews covering almost every aspect of current alkaloid research...The natural polyamines more usually figure in biochemistry tests, so it is particularly good to see a review of these relatively simple molecules from more chemical point of view." --Jeffrey B. Harborne, Plant Science Laboratories, University of Reading "This fiftieth volume of the long running series familiarity known as "Manske" continues the tradition of comprehensive excellence initiated by its founding editor, the late R.H. Manske, and begins with an engaging overview of the life of this outstanding alkaloid chemist by two of his colleagues, D.B. MacLean and V. Sniekus...up to date and authoritative...consistently useful to alkaloid scientists that it deserves to reach its centennial year." --Tom H. Cheavens, New Mexico Highlands University, JOURNAL OF AMERICAN CHEMICAL SOCIETY, 1998

The 58th volume in this essential series --This text refers to the Digital edition.
