## Customer Reviews

This book is unlike any other marijuana books on the market. It's one of the first marijuana grow books I bought and definitely one of the few ones I actually still flip through occasionally. It contains detailed information on how to diagnose and fix just about any problem you may face while growing indoor marijuana. This book has everything you need to know, including why you're experiencing

your problem, how to prevent it in the future, and all the different ways you can go about fixing it.

large type, easy to read with good explanations as to the "why's" of growing. .

This book is very informative! Very scientific. U can tell the writer is well experienced. It's many marijuana grow books out there to choose from and I'm glad I chose this one!

Good general information book.

Pretty basic and worth \$10. Had the information I needed.

Great Product

Great book. good read. Great Seller.

Good info, just mentioned for a larger grow op.
