Gerontological Nursing

Synopsis

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Prepare your students for successful gerontological practice! Focusing on the content that students need to know for effective practice, this text offers engaging, evidence-based coverage of the aging process, factors contributing to healthy aging, and unique aspects of disease presentation and management in older adults. Updated to help students meet the challenges of this increasingly diverse population, the ninth edition retains its acclaimed holistic approach through insightful coverage of the psychosocial, legal, ethical, and spiritual elements of patient care.

HIGHLIGHTS OF THE NINTH EDITION Concept Mastery Alerts improve students' understanding of potentially confusing topics, as identified by Lippincott's Adaptive Learning Powered by prepU. Consider This Case, Bringing Research to Life, Practice Realities, and Critical Thinking Exercises make concepts come alive and show students how the concepts they are learning are applied in real-life contexts. In-text learning aids—including bolded key terms, communication tips, points to ponder, key concepts, and chapter summaries—help students master important material. Nursing Diagnosis Highlights provide overviews of common diagnoses, covering causes to interventions in an easy-to-understand manner. Nursing Care Plans outline diagnosis, goal, and action for selected health conditions, giving students practical models for effective health care planning. Assessment Guides walk students through general observation, the history-taking interview, and the physical examination. To develop highly capable nurses and promote sound clinical reasoning skills, the ninth edition is supported by Wolters Kluwer's suite of best-in-class digital solutions, including prepU (adaptive quizzing), DocuCare (educational EHR software), and vSim (realistic virtual simulations co-developed by Laerdal Medical and Wolters Kluwer, which are based on the NLN ACEs Unfolding Cases).

Customer Reviews

Very explanatory

Required book for my nursing program but they used other resources more than they used these textbooks.

Book received in poor condition but had no choice but to use it due to classes starting. Returned book at end of class and was told I had to pay full price for book! Was returned back to me. I didn't do the damage in the first place and it was returned like it was received! Very frustrating!

While you're not going to find anything in here that you wouldn't find in a thorough med-surge book (well, in relation to the aging process and health) it's a quick, concise text in an easy to read (honestly, almost over-simplified) format.

Very easy to follow, the passages are short and to the point. It provides crystal clear explanations to brief pathophysiological aspects. Definitely recommend for geriatrics studies.

I have to read this for school. Luckily, it was well written. Arrived on time. Thank you.

Easy to access specific information required. Topics are relevant and well presented with some helpful tips. The references to referred material is current and provides additional resources.

The book's a little old but it was still an interesting read.
