Grosset & Dunlap creates high-quality books for young readers of any level. Focused on books for ages 0-12, Grosset offers a wide range of original fiction series, nonfiction titles, leveled readers, and licensed tie-ins to captivate every reader.

I'm 50 years old and I love the Octonauts. There, I've said it and I'm glad. This cartoon show is excellent for children - male and female characters and although the trio of male characters (Captain Barnacles, Kwazii and Peso) have most of the adventures, engineer and inventor Tweak and photographer and navigator Dashi provide invaluable service to the team as well (as does Shellington and Tunip...professor Inkleling not so much!) This oversize book covers 50 of the

creatures that the Octonauts have encountered in their adventures. Written very simply, lots of illustrations...it is a fun read and even adults will feel they have learned about the denizens of the deep from reading this book. And there are a lot of stickers - mostly of the Octonauts but also of the creatures covered in the book. Highly recommended.

Great... Except for binding. BUT my daughter didn't care one bit that the pages started falling out. She ADORES this book, all the pictures, the info, the stickers, etc. We decided to take our "lemon" and make lemonade. Bought a 3 ring binder and a package of page protector stickers and made a cool book. You can find the stickers near paper clips at Walmart. They're white circle stickers that keep the page from tearing. (can't remember what they're called!) We added all her printed coloring pages to her binder. Now all her octonaut stuff, Disney Jr online pages, are together. Even added the cover to the front sleeve of the binder. She shows it and reads it to everyone.

Our girls LOVE anything Octonauts. They love it so much that this is our second purchase of the Creature Report book. However - I would highly recommend buying the older version of this (from 2013) if you can find one. The older version has many more stickers and a different set-up - on each 'creature' page, the child seeks out several stickers to add to the page - a small picture of the fish, a sticker for the zone of the sea that the creature is in (sunlight, twilight, midnight) and then the stickers representing the food the creature eats. This was the part that my 3 year old loved best and was the main way that she was actively learning when we used this book. She learned a ton from it and looked forward to completing each page with the needed stickers. There are also several pages of additional stickers of the creatures themselves and the Octonauts. The new version (this one) doesn't have any of the 'to do's' that the old one did - and it seems like less pages of stickers. Much more passive and not as fun for the kids. If they haven't seen the old version, they might not care. I just ordered a few more copies of the old version, to use when we finish up with this one.

My son is obsessed with the book, but true to the reviews the pages quickly started falling out. However that was easily fixed for \$3.50 at Kinko's. They rebound the book in a few minutes and my son likes it even better since the pages are easier to turn and now stays open to the page you are on.

Totally fell apart within days of use. Great content but poor construction. Sad because it was a favorite Christmas gift (among shinier other toys!)

I have purchased Octonauts Creature Report two times. Both times it was for my son, who is 3, and in love with the Octonauts. Not only is this book very informative and interesting, it is also very engaging, even for little ones. My son loves to read and learn about all of the intriguing creatures and look at the colorful art. He also loves all of the included stickers! The book has held up to my rambunctious son very well. My only reason for purchasing it a second time is for more of the fantastic animal, Octonaut, and Gupp stickers. I highly recommend this book for anyone who likes the Octonauts.

I read all the reviews and was concerned about the book falling apart, but took a chance. Unfortunately, ours is falling apart also. My 4 year old grandson loves the book, and keeps trying to put the pages back in the book, but more just fall out. The book content is great. Grandson loved all the stickers. So for content it would be 5 stars but for book quality 2 stars (a few pages stayed in the book).

My son loves this book however it is very cheaply made and the binding is nearly nonexistent, a lightly glued spine that holds the pages together. The first night two pages fell out, I thought about asking for an even exchange however I suspect the replacement would have the same borderline nonexistent binding. A week on now and 16 pages are out of the book and most of the rest are ready to follow. It's too bad this one isn't offered for a kindle (although then your child would have a hard time getting lost in the pages unless they're reading it on a Kindle 10).
