# Architect's Drawing Kit: Draw Your Home In 3-D

## Synopsis

The Architect's Drawing Kit is an educational drawing and coloring kit for professionals and students of architecture, design, art, and STEM. The kit includes interior and exterior perspective and isometric drawing charts showing three dimensions, detailed sample illustrations, plus instructions and tracing paper. First, trace the illustrations to see how perspective and isometric drawing work and learn how to draw accurately in three dimensions. Then use the charts and tracing paper to sketch your own dream or real decorating, remodeling and building projects. The intricate sample illustrations are inspiring, making the kit an outstanding architectural coloring book. Add color and texture to details such as shingles, siding, flooring, kitchen cabinets, furniture, windows and doors. Architects, engineers, and designers use freehand perspective drawing to explore and communicate design concepts. In these professions, drawing is thinking. The Architect's Drawing Kit can help you learn, practice, and hone this invaluable and timeless skill in an exploratory and fun way. The kit is part of the three-part design series by Daniel Reif. Sketch your design with the Architect's Drawing Kit, try out endless floor plan layouts with the Home Quick Planner, and once you have a design that you like, build a three-dimensional model with the 3-D Home Kit. These best-selling design tools are sold separately and can be used together or independently.

## Book Information

Spiral-bound: 65 pages

Publisher: Design Works, Inc. (September 30, 2016)

Language: English

ISBN-10: 1880301113

ISBN-13: 978-1880301111

Package Dimensions: 11.7 x 8.7 x 0.6 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 2 customer reviews

## Customer Reviews

I bought this kit because I enjoy thinking about how I can improve the design of my home and I love

this company's other two products, the Home Quick Planner and 3-D Home Kit. It's excellent that all three products work together for a complete architectural experience--drawing, floor plan design and furniture layout, and three-dimensional model building. I initially saw these products on HGTV. My wife and kids also like these products, so I bought two of each! The Architect's Drawing Kit teaches the basics of how to make perspective drawings of real or dream decorating, remodeling and building projects. It's a must have for students interested in STEM, architecture, design, engineering, or art. It's also good for just having fun with coloring--a very popular activity these days--so it makes an excellent gift as well.

My niece loved it.
