The Everything Kids' Magical Science Experiments Book: Dazzle Your Friends And Family By Making Magical Things Happen!

Synopsis

Dazzle your friends and family with dozens of science tricks! Kids may not clamor to study science and physics, but they sure enjoy anything that has to do with slime, invisible ink and obtaining the ability to make things disappear. With *The Everything Kids' Magical Science Experiments Book*, kids will be able to bend the rules of time, space and logic by performing over 50 "magical" science experiments. Parents will love the fact that their kids are learning while having fun, by performing feats such as: Changing salt to sugar, Creating a real life genie in a bottle, Creating and writing with invisible ink, Making a person stay seated, just by using their pinky finger, Sealing a punctured balloon with a penny, Changing Mentos candy into soda. *The Everything Kids' Magical Science Experiments Book* is packed with 30 "magical" science-related puzzles and over 50 experiments that are sure to get kids excited about chemistry, science and even physics!

ISBN-10: 159869426X

ISBN-13: 978-1598694260

Product Dimensions: 8 x 0.4 x 9.2 inches

Shipping Weight: 5.6 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 32 customer reviews

Best Sellers Rank: #93,068 in Books (See Top 100 in Books) #60 in *À* Books > Children's Books > Science, Nature & How It Works > Experiments & Projects

Age Range: 7 - 12 years

Grade Level: 4 - 7

Customer Reviews

Tom Robinson (Chelan, WA) is a National Board Certified Teacher, teaches high school science and maths and has co-authored an online advance placement physics course. He lives with his wife and two children in Seattle.

Please note this is for the Kindle version only. The hard copy version is still a go. None of the color or connect or depth experiments are active in the Kindle version -- at this price shame on the

publishers. For future reference this significant difference should be prominently posted as I would have purchased the hard copy for my Grand-daughter's birthday. As it is, the experience has been a good learning tool: she, that not everything is perfect and I, that I need to verify rather than assume.

Haven't tried any experiments yet. Thumbed thru the book interesting experiments. Can't wait to try a few of them.

Lots of good projects

This book is a go if your kids are old enough. Quite a few of the experiments would be less than appreciated by younger kids. As a lower elementary school teacher I bought this book to find great experiments to do the kids in my class. There are some fun ones, but most of them are a bit high for my kids.

I bought this for an eight year old boy and he was really excited about it. He tried a few (worked on them with an adult so it was good bonding time) and seemed to enjoy himself well enough. It was particularly helpful because we had him reading the experiments out loud to work on his reading skills and he was interested enough in doing the experiments so he kept at it even when he didn't necessarily understand everything.

The experiments in this book were very age-appropriate for my kids. Not only do they get the benefit of learning in a manner that is fun for them (ok, I am an overgrown geek kid-I loved them too), but we got to spend constructive time together that didn't involve our brains turning to mush in front of the idiot box. Supplies were easy to come by, and I highly recommend this book to any parent.

I bought a new book, but it had a damaged cover. It is printed in black and white inside. No colored pages.

As Described.....Perfect Items for a "Mad Scientist" basket for a raffle.....Quick Ordering! Quick Delivery! My life easier. GREAT!!!
