Web Colors (Code Babies)

Synopsis

CODING FOR KIDS . . . Because it's never too early to start developing! Coding and web-design skills are becoming more and more important in our technological world. These concept books will familiarize young ones with the kind of shapes and colors that make up web-based programming language and give them the head start they need. Help your little ones learn how to specify web-safe colors with this hexadecimal lift-the-flap book, and get them started on the visual patterns and symbols that make up the essential building blocks of the web.

Age Range: 3 - 5 years

Grade Level: Preschool and up

Customer Reviews

I thought this was a cute kiddie book. It is in some ways, but honestly this has more adult info for parents to read while they teach colors to their kids.

I can't give it 5 because my granddaughter's only 13 months old. But at 13.5 months I'm certain she will be able to spot phony masterpieces, and define all wavelengths and characteristics of colors and other related radiation reflected bent or otherwise impacted by space-time, and gravity. I also gave her an aeronautical engineers children's book so she may stray into various types of fluid mechanics and drift away from photons etc.?
